CHAPTER VIII GENERAL CONSIDERATIONS In the previous chapters the author has systematized his conclusions in the interpretation of blood-pressure as affecting the heart, brain, kidneys, and general circulation. In order to obtain an expression of opinion, there was published, just previous to the writing of this little book, a series of short articles in various medical journals. These elicited enough discussion to show that the subject is one in the mind of many general practitioners. Among the articles, one entitled The Importance of Treatment in the Early Stages of Arterial Degeneration was commented upon by Dr. Beverley Robinson, of New York, and others, as being a true picture of the condition described. The points brought out were that the term degeneration of the arteries is a better Medical Record, April 2, 1904. term than arteritis, arteriosclerosis or endarteritis, because it is less definite and...
