Springer. Paperback. Book Condition: New. Paperback. 291 pages. Dimensions: 9.1in. x 6.1in. x 0.7in. This state-of-the-art survey of technologies, algorithms, models, and experiments in the area of Internet Quality of Service is the final report of COST (European Cooperation in the field of Scientific and Technical Research) Action 263, Quality of future Internet Services, <http://www.fokus.fraunhofer.de/cost263> (QoFIS). COST 263 ran from January 1999 until October 2003 with the participation of some 70 researchers from 38 organizations from 14 European countries (France, Hungary, Italy, Sweden, UK, Belgium, Germany, the Netherlands, Portugal, Slovenia, Switzerland, Finland, Greece, Romania, and Spain). The Action - longed to the COST area Multimedia and Internet Communication; together with COST 264, Networked Group Communication, this Action continued the effort started in 1992 by COST 237, Multimedia Telecommunications Services. Both groups have combined their efforts now in the Network of Excellence in Emerging Networking Experiments and Technologies, <http://www.ist-e-next.net> (E-NEXT) of the 6th European Framework program. The book consists of seven chapters that were written in 18 months by 67 individual authors. The main objective of this book is to report the state of the art in the area of QoFIS, as perceived by the authors, including achievements that were originated by the authors. The book was designed in a top-down manner: after three years of running the Action with close co-ordination of research efforts, it was easy to achieve a consensus on the table of contents. To ensure the content quality the following roles were defined and assigned to COST 263 members: chapter editor, chapter author, chapter reader. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
